Dear Mick

Re: Rewiring Conveyor Control and Drives - 'AC' Body Shop & Trim Shop

On behalf of Vauxhall Motors may I record my congratulations to you and your staff for the work carried out on our conveyor systems during the Whitsun and August shut-downs.

In particular, I must comment on the complete rewire of our Body-in-White Conveyor Drives and associated controls. As you know the continuity of production is absolutely vital to Vauxhall and this is the first instance which I can recall whereby we did not experience any problems or stoppages whatsoever during our SOP on the Monday return shift or indeed any problems whatsoever in the 14 shifts since.

Over this annual closure I can also record that the reprogramming of our Paint Shop Drop Section and the relocation of the overhead storage roller beds have also been faultless.

The quality of your work is first class and the expertise of your Engineers in our control systems in implementation and back-up services strengthens our belief in your company.

Yours sincerely

Manager  
Works Engineering
