Subject: Landrover / McDonald Humphries Partnership

Dear Mick,

Landrover vehicles are very pleased with the control system and electrical work within the new Paint shop to Southworks bridge and fifo store. Although there has been a number of mechanical problems, which have not yet been resolved, the electrical installation runs virtually without any faults. Any problems that have arisen have been dealt with swiftly and professionally. From the maintenance associates up to management we have always recieved a courteous service with information and explanations readily offered.

As a Landrover vehicles preferred supplier of software and controls systems, McDonald Humphries will be a partner with us in developing a controls strategy within Landrover, possibly to the extent of underwriting all outside suppliers software and controls systems.

Yours Faithfully

Maintenance Manager
