

MacDonald Humfrey (Automation) Ltd

Mission Statement

Our customers and end users benefit from our cross pollination between industry sectors and co-ordinated interdisciplinary activities. This work philosophy opens the way to new solutions, optimisation of designs and the setting of higher standards.

For us quality does not represent an abstract general concept, but a consistent standard, which we expect in every detail. It is only through quality and attention to detail that solutions can be created which fulfil both our own requirements and those of our customers. The framework for this aspiration is provided by a quality assurance system in accordance with ISO 9001.

SPECIALISTS IN ELECTRICAL CONTROL SYSTEMS
